Innovative Materials

PP and PET coated decorative panels

INOMAT COLLECTION

Innovative Materials

The Inomat Collection is NettFront's latest innovation — a fusion of quality, creativity, and modern design. This product family embodies everything the brand stands for: innovation, versatility, and uncompromising aesthetics. More than a response to trends, it redefines what's possible in furniture design and interior architecture — made for professionals who dream, design, and build inspiring spaces every day.

The first product line in its category to be fully developed and manufactured in Hungary, combining local expertise with precision craftsmanship.

The NettFront Vision

The Inomat Collection marks the beginning of NettFront's own **interior design ecosystem**. Each product family connects seamlessly with the others — allowing designers and manufacturers to combine Inomat panels effortlessly with our foil-wrapped and milled fronts. This freedom of combination opens up **endless new opportunities** in both design and execution.

Versatility that fits every space

From kitchens to offices, from hotels to homes — the **Inomat Collection** provides a reliable foundation for every element of furniture production, from fronts to interior components.

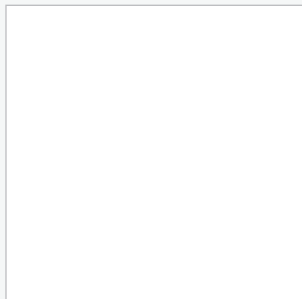

Easy to work with, easy to love.

- Effortless for carpenters to handle.
- A dream to design with.
- Irresistible for the end user.

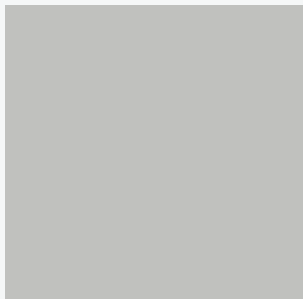

Inomat Basic

The four most popular matte colours — now enhanced with **fingerprint-resistant** and **highly durable** surfaces. The perfect choice when value and aesthetics go hand in hand.

Inomat Basic panels are available **exclusively in board format**, with **colour-matched ABS edging** supplied directly from our permanent stock.

Polar White — 1D

Inomat Pro

Colourful and versatile — the next evolution of the Basic line. **Inomat Pro** offers an **extended palette** in both matte and high-gloss finishes.

Our **high-gloss** surfaces are mirror-smooth and exceptionally durable. The **matte** versions deliver everything you expect from advanced laminated materials today: **anti-fingerprint, high scratch and abrasion resistance, easy to clean, and consistent quality on both sides**. Perfection, now visible from every angle — **no compromises**.

Inomat Pro panels are available in **board format or precision-cut with seamless (zero-joint) edging**.

Ecosystem in practice

Inomat Pro opens new possibilities in interior design. Select any matte colour of your choice from our Inomat Pro collection and combine it freely with any of our 3D fronts, such as our shaker and Linea models.

Products shown in the image:

Inomat Pro - Dune Beige

Linea - Delta (B100) - Dune Beige

1D - Available as flat panels in both Inomat Basic and Pro collections.

3D - Inomat Pro matte colours are fully compatible with NettFront's milled, foil-wrapped front designs — offering limitless creative combinations.

Premium-quality, super-matte or ultra-smooth, velvet-touch surface

High-gloss finish with outstanding surface stability and depth effect

Metallic-look, subtly shimmering finishes available

Excellent abrasion resistance

Easy to clean and maintain

Fingerprint-resistant

High water resistance

Strong resistance to household chemicals

Excellent UV resistance

Enhanced colour fastness

Easy to machine and process

Specifications

Size: 2800 x 1300 x 18.6 mm

Core: MDF

Back side: Color-matched surface on both sides. The reverse side of our matte Pure White and high-gloss products features an embossed texture and is finished with a white laminate.

Edging: colour-matched ABS edge banding (available in 23/1 mm and 43/1 mm)

Availability: supplied in board format or precision-cut with zero-joint edging

Protection: Protective film on both sides. Matte Pure White and high-gloss colors are supplied with protective film applied only to the colored side.

Technology

Decorative board coated with polyethylene terephthalate (PET) surface on an MDF core.

Features an ultra-smooth, colour-matched surface on both sides, with exceptional mechanical and aesthetic properties.

Recommended Applications

Ideal for:

Furniture fronts, cabinet bodies and decorative components. Vertical and light-duty horizontal surfaces.

Not recommended for:

Worktops or other high-impact horizontal areas.

The Inomat Collection is designed to combine aesthetic appeal with everyday functionality, offering reliable performance.

Quality Assurance and User Guide

The detailed description of our quality standards, warranty information and user guidelines is available on our website under the Downloadable Documents section.

Warranty

We provide a 5-year warranty on all board-format and custom-cut products when used as intended.
